**GuideLight** is an LED lighting products specialist and lighting services provider based in GTA. We have a comprehensive range of high-quality, customizable LED products cover your all-round demands from residential, commercial to industrial. Our fantastic choices of luminaries include but not limited to High Bays, Flood lights, Pole Lights, Pendant Lights, Panels, Downlights and Strips.

## Leading LED Lighting for any environment

Our Product Design and Management team have combined their intelligence to develop our comprehensive range of LED luminaries, striving to achieve one simple aim - to offer an efficient, easy to install and long-lasting solution to suit any residential, commercial and industrial lighting application. The LED technology has brought a host of benefits: lower energy cost, lower maintenance cost, better for the environment.

GuideLight puts quality and functionality in priority. Our products have cUL, cETL, DLC, Energy Star certifications to be fully qualified to be used in the Canadian market. We have manufactured and developed a wide range of LED luminaries to be suitable for any environment, and we are here to help you to make the right choice.

## One-Stop Service - We get what you need

GuideLight, who knows lights better, serves you better. We provide lighting design, lighting installation, 3D shop drawing services, able to help you apply for building permits, and we have also customized lighting for builders, designers and renovators for over 10 years. Beyond that, we also have a great relationship with electrical engineers and other professionals if you need their services.

**Application:** Bedroom, Bathroom, Living Room, Kitchen, Family Room.

## LED Linear High Bay

The LED linear high bay is designed to perfectly replace the traditional 8ft long T8 fixtures. It is made to have the intelligent lighting options which means it can be compatible with Zigbee wireless control system, daylight sensor dimming, microwave sensor dimming or three in one dimming. It is super-bright, widespread lighting, and super energy efficient (175lm/w).

## ALUMINIUM PROFILES

This led strip light channel can accommodate our LED strip lights, each profile is expertly engineered for specific installations, such as surface mounted, recessed and plaster-in. The light diffuser slightly diffuses the light to create softer, smoother lighting effect. These high quality profiles cover a wide range of application such as walls, floors, stairs, ceilings and shelving.

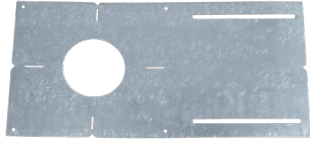

Our aluminium channels and plastic covers can be cut easily to your desire length by a regular hack saw. We also have bendable profile allows you to create smooth curves.

We have clear and frosted diffuser options available to not only mount and protect your strip installation, but also to enhance its light output to suite the requirements of your environment. The cover simply snaps in place for ease of installation and disassembling.
